SURVEY NOTES

This survey was made by AARON ASSOCIATES of Oconto Falls, Wisconsin under contract with the U.S. Department of Agriculture, Forest Service for the purpose of locating and marking the boundaries of U.S. Government lands on their perimeter and within Section 33, Township 33 North, Range 14 East, 4th Principal Meridian, Langlade County, Wisconsin.

The U.S. Government lands in Section 33 were acquired in 1936, 1938, and 1968.

The original government survey of this township was made in 1865.

The corner positions recovered, restored, and established by this survey are marked by the monuments described in the map legend.

The corner positions established were located to an accuracy of one part in 3000.

The field notes and a copy of this plat map are on file in the Forest Supervisor's office at Rhineland, Wisconsin.

Wisconsin Central Zone Coordinates were computed from GPS observations and are based on 1983 North American datum.

The bearings between corner positions are Grid bearings based on the Wisconsin Central Zone State Plane Coordinate System.

Conversions between grid bearings and true bearings are performed by the use of the following algebraic formula: True bearing - Convergence angle = Grid bearing. (Close attention to the algebraic sign must be observed, i.e. +/- of the convergence angle).

Ground distances are shown on the Plat map. Conversion between Ground distance and Grid distance is performed by the following formula:

Grid Distance / (Grid Scale Factor X (20,906,000 / (20,906,000 + Mean Elev.))) = Ground Distance
